

Audits done smart.

Conduct and evaluate audits digitally.

www.mQuest.de

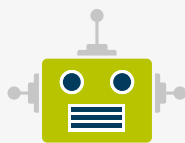

To ensure high quality of product or service standards holistic audit process are essential. Therefore KPIs are recorded with freely definable, but structured checklists and forms. The application is running native and offline-capable under iOS or Android.

Thanks to digital data acquisition and process optimization, mQuest® Audit improves sustainable and effectively the implementation, documentation and evaluation of

every process and product audit. Paper and Excel are being superseded. The mQuest® app can be conveniently downloaded from the Apple App Store and Google Play.

The obtained results provide valuable information to improve production, maintain contractual standards as well as quality specifications and increase customer satisfaction in the long term. Because quality means the customer is coming back.

Digital, mobile, paperless

With mQuest® Audit time consuming and cumbersome paper or Excel-based audits are finally a thing of the past.

Complete records

Digital forms, that are adapted to individual operating standards, guarantee a complete documentation of all relevant data, including photo evidence.

Plan and control

Master data, such as plants or products, are central maintained via the mQuest® Audit Portal. Audits can be planned and controlled comfortably.

Data visualised

Configurable portals and dashboards make organisation, evaluation and presentation from audits easier than ever before.
